**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 26 September 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 12, 14-16, and 18-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koch, III, US Patent 5,299,720, in view of Kobdich, US Patent 6,186,383.

See the embodiment of figures 8-10 of Koch. Koch provides what is considered a safety handle capable of being used for temporary attachment to a pier piling for use by passengers during boarding and exiting a boat, said safety handle comprising a base member 4 constructed of a relatively flexible sheet of material, said base member further defined as having a front surface 8 and a back surface bounded by a top edge and a bottom edge with a first and second side edge, a handgrip 3 secured to said back surface, said handgrip formed with a receptacle 5a, said receptacle sized so as to be capable of receiving a light stick, a pair of

straps 9 connected to said base member, one said strap adapted to extend around said piling, as claimed.

Koch provides the claimed invention except (1) said front surface adapted to contact an including integrally formed rigid protrusions designed to temporarily prohibit movement of said base member, as claimed; (2) said receptacle made of a material permitting light to shine through, wherein said base member and said hand grip are plastic, and said hand grip receptacle being translucent, as claimed; (3) said base member is wood; and (4) said strap is of a length sufficient to encircle said piling between 6 inches and 20 inches.

Regarding (1), Koch discloses the handle for engagement with a metal surface. Kobdich teaches rigid projections 26 for engagement with metal surfaces for improved clamping/attachment purposes. It would have been obvious to include rigid projections on the device of Koch for the purpose of improving attachment of the device, particularly to metal surfaces.

Regarding (2) and (3), it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device in these ways, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. See also *Ballas*

*Liquidating Co. v. Allied industries of Kansas, Inc.* (DC Kans) 205 USPQ 331.

One purpose of such a modification might be aesthetic appeal.

Regarding (4), it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device in this way, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

### ***Response to Arguments***

3. Applicant's arguments with respect to the claims of record have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

This action is non-final.
